

TIPS TO HELP STUDENTS WITH HL ACCESS HBL

Prepare Students for HBL

Brief students on how assignments will be given and submitted.

Train students on the tools (e.g. zoom, speech-to-text) that they can use.

- Remember to explain how students can access such tools.

Consider if hard copy materials would be a viable alternative for some students or some assignments.

Prepare these beforehand and make them available to students prior to lessons.

Enhance Accessibility of Teaching Materials

Design learning materials to be as universal as possible so as to cater for students with diverse learning needs.

- Avoid voice recording assignments or allow for alternatives for students with poor speech
- Provide transcript of audio and video content

Use videos with closed captions or create your own videos with closed captions.

Web-based program to add captions to online videos easily for free.

Enhance Accessibility of Online Lessons (Pt. 1)

Use web-based tools that can enhance accessibility of online lessons:

- ▶ Google Meet is suitable for conducting online lessons with students with HL as captions can be enabled.
- ▶ Online whiteboard such as **Classroom Screen** can be used to give visual instructions to students.
- ▶ Screen and video recording tools such as **Loom** and **Scrcast-o-matic** can be used for recording teacher's face and teacher's computer screen at the same time.

Loom

Scrcast-o-matic

Enhance Accessibility of Online Lessons (Pt. 2)

- ▶ Ensure good lighting when recording / live-streaming the teacher's face.
- ▶ Ensure that teachers and peers turn on video function during online lessons, especially when speaking.
- ▶ Provide transcript of online lessons to students using speech-to-text programmes.
