

Mr Teo Cheng Guan

I believe education should spark joy and excitement in learning. Every student should look forward to coming to school, driven by their natural curiosity and desire to learn. We empower students to take ownership of their learning and help them grow into confident learners who think creatively, communicate effectively, and collaborate with others. We will nurture young changemakers who make positive contributions to their community. When students discover the joy of learning and believe in their ability to make a difference, they become lifelong learners and active contributors to society.
