

Ms Sarah Ang En Ling

I believe that every student possesses unique potential waiting to be unlocked, one that need not be defined by academic achievements alone. I am committed to nurturing a safe, inclusive learning environment where students discover the joy of learning and personal growth. Through authentic experiences that bridge classroom knowledge with real-world applications, I aim to make each lesson meaningful and engaging. Success, to me, is measured by how each child grows and evolves during their time with us into better versions of themselves - one who is ready to navigate life's challenges.
